Jianna, nobody's maps are working, but their code looks right. Am I missing something??
Great looking app! The map didn't load but I'm going to assume it worked for the author. Good idea, nice main menu that lets you select options. Also added the ability to add markers as requested in the assignment description. Very good work!
Works good. nice job.
Great app! I like the functionality of the filters and you got markers working! Nice job!
Find nearest restaurant was cool. Good idea, and well done. The front page filter i did not even notice at first, but that was also pretty sweet.
I like how you have a title and you label the type of food restaurant. Met criteria 1-3

Suggestions and Criticism

none.
Hard to grade. I was not able to get the map to display. I tried putting my own api key and still does not work. All I see is a title and spinner.

In the add marker, it seemed like it wanted to add it to a location. Then when i tried to select my new marker, it would think i tried to change the location to add it again, which was kind of odd. Got it to work after a couple of attempts though.
The design of the main menu could be a little more appealing. To be honest it's a little plain looking. Nothing a little bit of color or formatting couldn't fix.
GUI is a little plain... maybe add some color??? other than that good work!

oking at code)! Looks like you got the spinner up and running too. nice!
Jianna, nobody's maps are working, but their code looks right. Am I missing something??
Works good. nice job.
Unknown- Failed to load map. :/
I like how when the map starts it centers at Bellingham. Overall code was easy to understand and simple. Met 1-6 of the criteria. I like how your map actually displays without me doing anything.
I couldn't get the map to load so I'm going off of the code and what did load. The spinner looks good, I assume it works well.

Suggestions and Criticism

none.
I think it would of been better if the spinner labels was not one, two three, four but something more related. The hello on the bottom of the screen felt irrelevant.
Unknown- Failed to load map. :/
I would be nice is the spinner said the name of the location it would take you too. Also I don't think adding custom markers or lines was implemented in this project. That would have been a nice addition.
The Spinner's items are too plain. They should tell the user what they are about to click.

I was unable to get the map to load but code suggests that they got the bare bones done to pass. Looks like they used a satellite mode for viewing.
Jianna, nobody's maps are working, but their code looks right. Am I missing something??
I like how the map actually displays without me doing anything. I like how it is a satellite view of earth. Met criteria 1-4.
Works good. nice job.
I could not get the map to load for this app so I tried to look at the code to see what was done. I like that they used satellite mode for the map. Besides that they did just what was required to get a passing grade.
Unknown- Failed to load map. :/

Suggestions and Criticism

none.
Super basic app, if more time was given I'm sure the developer would have added more features (like from the assignment spec)
Your my location button doesn't really work. Not enough marker to meet criteria 5 (you need at least 11..)
Unknown- Failed to load map. :/
The app is very simple. It could use a lot more functionality than it has. Any of the suggested functions would have made the app much better.

I really like how you could toggle on and off the draw modes. That was a super bright idea! Excellent work!
I like how everything is set up so it is organized and it is also easy to use the features. Met criteria 1-8. This is good work. I like how you have a reset all button so that I can reset it to default look.
Jianna, nobody's maps are working, but their code looks right. Am I missing something??
Assuming the map works this is a very nice app. The buttons are labeled well and the app is very looks very easy to use. There is a very nice selection of cities to choose from. I also really like how there are marker and draw modes that can be toggled on and off.
Works good. nice job.
Unknown- Failed to load map. :/

Suggestions and Criticism

none.
Keep it up!
I might suggest having all the menu options on the top or bottom of the screen. Right now they are split among both the top and bottom. However this is just a personal preference and doesn't take away from the app.
Not much I can say this is excellent work. Maybe a little more commenting on code.
Unknown- Failed to load map. :/

ht. Am I missing something??
Works good. nice job.
Unknown- Failed to load map. :/
I could not get the map to load for this app. The spinner has lots of different locations and is very easy to use. The app is simple and doesn't confuse the user.
I like how you label the spinner label with spinner name. Met criteria 1-3.
Spinner has lots of places to choose from and seems to be easy to use.

Suggestions and Criticism

none.
Hard to grade. The google map did not display at all. I tried entering my own api key but it doesnt work.
Unknown- Failed to load map. :/
The spinner looks a little strange. I'm guessing this was to make it easier to click, which is nice, but it still looks a little weird. The ability to add markers and draw lines would have been a nice touch.
