### Praise for submitter

Loaded the map well with your preset markers. Nice attention to detail including hours and a small description of restaurants. The spinner nicely centers the selected place within the map window.

Looks good like the idea.

### Suggestions and Criticism

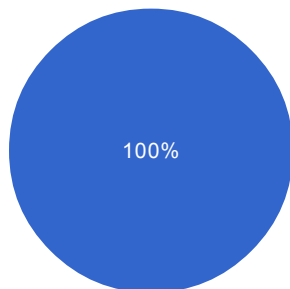

Your map fragment only fills half the screen, the other is dominated by mostly a blank section. The app is mostly about the map, so the map should dominate the screen. Also paths and new markers were not implemented. As a side note, consider starting your map zoomed in on your markers.

Maybe don't make the map start at max distance since everything marked is so close.

Seemed to be working but I couldn't get the map display so I can't really grade it.

Nice clean design. Spinner, clear path button. Paths logic.

### Suggestions and Criticism

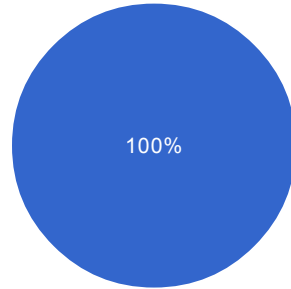

Can't tell much since the map won't display but maybe if that's a bug then fix it.

Sometimes had trouble loading map, otherwise good. Had this issue with two of the apps in your group.

### Praise for submitter

Clean design, couldnt see much more. I tried 2 devices with same result.

Could not get the app to run so I cannot grade it.

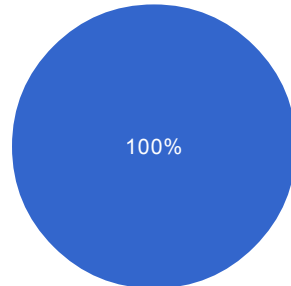

### Suggestions and Criticism

Map would not load so it was hard to see what features were implemented and which were not. Had this issue with two of the apps in your group.

Could not get the app to run so I cannot grade it.

### Praise for submitter

Looks good seems to work well.

App did everything the spec required. Ran smoothly.

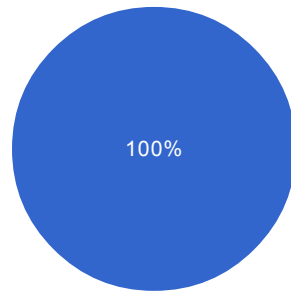

## Suggestions and Criticism

Could have added more features.

Some color would be nice. Also on smaller devices(5in) your clear paths button gets smashed to the bottom of the screen and the text in the button becomes unreadable. Not a big thing.

Good work! Nice app Clever!

Could not get the app to run so I could not grade it.

### Suggestions and Criticism

It could have used a little more color, and also an application icon.

Could not get the app to run so I could not grade.
