### Jacob Whitten

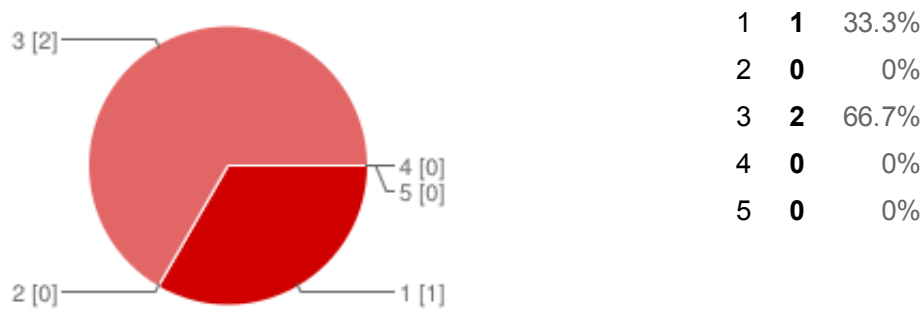

### Should the assignment receive credit?

Yes, it should receive credit. **0** 0%No, It should not receive credit **3** 100%

### Awesomeness

### On a scale from 1 to 5 please rate the look and feel of the app

### Praise for submitter

It looks like it's a pretty cool idea.

The layout requirement was fulfilled. It responds to events(button clicks)

It would not run

### Suggestions and Criticism

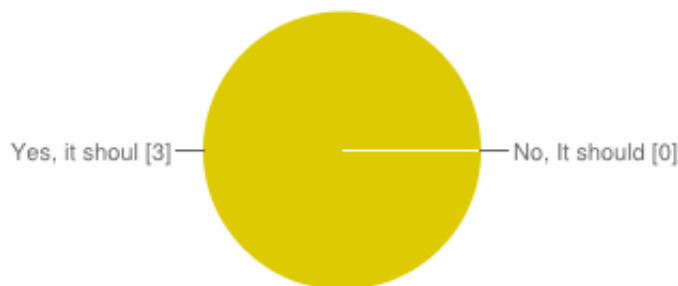

You left a section of code that was incomplete in your submission `public void saveOne(View v){ Button b = (Button) }` Once this was deleted the app was able to launch. This code was the start of the functionality of the rest of the program but was not included. Also the app was a little bland.

You seem to have some leftover code causing the project to not run. If we delete the several lines it runs fine but it doesn't work properly even when it runs. The project needs to be debugged.

Doesn't work, or run. Code is missing (Line 60 in DiceActivity.java doesn't compile). Might just have to remove that entire method for it to work, but I'm not sure.

## Alan Pilic

### Should the assignment receive credit?

Yes, it should receive credit. **3** 100%

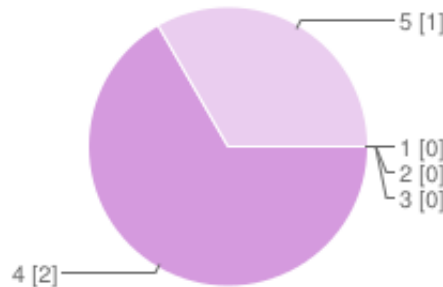

No, It should not receive credit **0** 0%

5	1	33.3%

### Praise for submitter

Runs well we could not find any bugs and the pictures come through good job.

Runs well, can't find any bugs. You did a super good job. I think you should print this out and put it up on the fridge.

It runs. The game can be played. Properties of controls and views were modified within the activities xml.

### Suggestions and Criticism

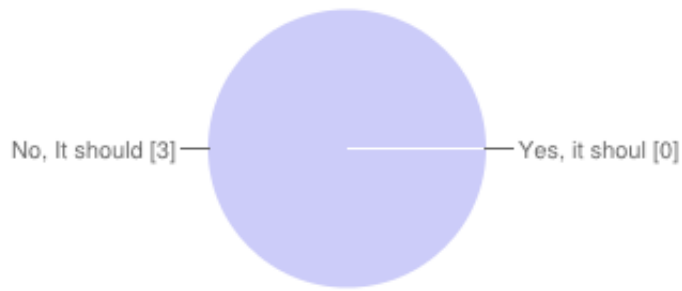

Doesn't have multiple layouts. Otherwise, it's perfect.

It does not have multiple layouts which was one of the constraints.

Does not fulfill requirement for multiple layouts.

**On a scale from 1 to 5 please rate the look and feel of the app****Praise for submitter**

Works well, no bugs, clean layout.

Runs and plays hangman good job.

App works and test cases passed. Looks fine! Reset button works.

**Suggestions and Criticism**

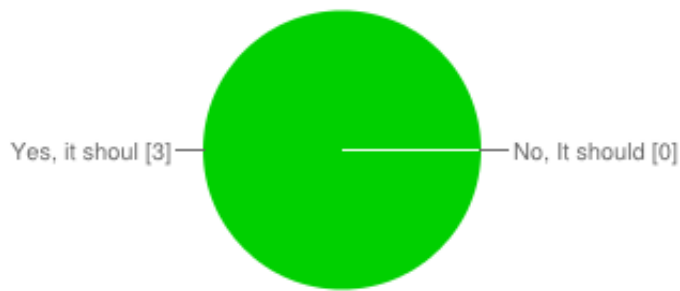

There was only one layout. The nested and multiple layout requirement was not fulfilled.

There is only one layout, which goes against the assignment description.

No nested layouts which was specified in the constraints.

**Erin Gunn**

5 **3** 100%

## Praise for submitter

Everything looks good the idea is original I like the hanging android great job overall.

Really well done. Plays well, really in depth, works well. Points for style. I like the addition of the android robot into your game.

Nice work. Well done taking hangman and adapting it. The layout work you did was great. also the settings and use of the activity label bar for the reset button was interesting. Separating the keyboard so that the keys could vanish when tapped was also well thought out.

## Suggestions and Criticism

When started up all that was visible was the hangman background. Try to work this bug out. usually happened when switched away from the app and went back to it
